INTERIM REPORT Q2 2015

KLP Kommunekreditt AS

Interim Financial Statements 2/2015

Main features in the first half year:

- · Maintaining healthy margins
- Weaker earnings compared to last year mainly due to financial losses from the liquidity portfolio and re-purchase of own debt
- · No losses on lending

Objective and ownership

The Company's objective is long-term financing of municipalities, county administrations and companies carrying out public sector assignments. Loans to companies are to be guaranteed by municipalities, county administrations, central government or a bank under Section 50 of the Norwegian Local Government Act. Guarantees are to be of the ordinary surety type covering both repayments and interest. The lending business is principally financed by issue of covered bonds.

KLP Kommunekreditt AS is a wholly owned subsidiary of KLP Banken AS. The KLP Banken Group is owned by Kommunal Landspensjonskasse (KLP). KLP Kommunekreditt AS was established in 2009 and has its head office in Trondheim. The brand name KLP Kommunekreditt is used in marketing to customer groups in the public sector.

Income statement

Net interest and credit commission revenues in H1 2015 were NOK 34.8 million. The corresponding figure last year was 37.0 million. Operating expenses in the same period amounted to NOK 9.4 million and 8.5 million last year. There have not been any losses or loss provisions made on loans. The Company has a pre-tax profit by quarter end of NOK 11.9 million. The corresponding profit in 2014 was NOK 33.9 million. The decrease is mainly due to losses on financial instruments this year.

Lending

The Company's loans to customers as at 30 June 2015 amounted to NOK 15.6 billion compared to NOK 16.3 billion as at 30 June 2014. The Company's lending is to municipalities, county administrations and local government enterprises.

Borrowing

The Company's borrowing comprises of covered bonds as well as borrowing from its parent company. No new covered bond issues were made in H1 2015. The Company occasionally restructures the debt portfolio with the purpose of increasing average maturity. Bond restructuring have caused total accounting losses of NOK 3.5 million by the end of H1. All covered bonds have an AAA rating.

Liquidity investments

KLP Kommunekreditt AS has strict rules on what assets may be included in the securities holdings. In addition to loans to the public sector the securities holdings comprise secure bonds as well as deposits in other banks. The securities comprise of certificates and bonds of high credit quality, principally investments in covered bonds with AAA rating. As at 30 June 2015, the bond portfolio's market value was NOK 2.5 billion. The net loss associated with liquidity investments amounted to NOK 10.2 million in H1 2015.

Risk and capital adequacy

KLP Kommunekreditt AS is exposed to various types of risk. The Company has established a framework for risk management aimed at ensuring that risks are identified, analyzed and subjected to management using policies, limits, procedures and instructions. The Company is to have a prudent risk profile and earnings are to be principally a result of borrowing and lending activity as well as liquidity management. This means that the Company is to have low market risk. Interest and foreign-exchange risk arising within the borrowing and lending activity is reduced using derivatives. The Company is to have responsible long-term financing and limits have been established to ensure that this objective is achieved. The credit risk in the Company is low and the Company's lending is limited to loans with local government risk. Management of the Company's liquidity is conducted through investments in banks satisfying credit quality requirements and in securities in accordance with Board-approved credit lines. The Company's securities portfolio has high credit quality.

At the end of the second quarter 2015, core capital i.a.w. the capital adequacy rules was NOK 683.7 million. Loans to municipalities and county administrations are risk-weighted by 20 per cent in accordance with the authorities capital

INTERIM REPORT Q2 2015

adequacy regulations. KLP Kommunekreditt AS had a core capital adequacy and capital adequacy ratio of 18.6 percent at the end of the second quarter 2015. The minimum statutory requirement is 11.0 per cent core capital adequacy ratio and 14.5 per cent capital adequacy ratio.

Future prospects

KLP Kommunekreditt AS has maintained profitability during the recent years. The Company has taken advantage of both its high creditworthiness and low market interest rates to obtain favourable funding terms. The recent international financial crisis gave rise to increased statutory capital requirements for financial institutions. The regulations on financial institution's capital adequacy indicate that banks, among other measures, had to increase their margins in order to be able to meet future capital and liquidity requirements. Even though the Company has had favourable margins development during recent years, it is not given that this development will continue over time. The general development in the financial markets on which the Company depends will affect the opportunities for growth and development.

The Norwegian economy has during the latest years been characterised by positive budget surpluses and high levels of employment. In combination with high life expectancy and population growth, the need for public investments is significant. The demand for loans in the local government sector and for projects with local government guarantees and local administration ownership is expected to remain high in the years to come.

The brand name "KLP Kommunekreditt" has a good position in the market for public sector lending. Its presence in the market contributes to competition and thus to the public sector having access to long-term financing at low costs. Customer surveys conclude that competition among creditors is highly valued.

KLP Kommunekreditt AS will also in the future contribute to financing of public investment projects. Volume growth will mainly be determined by the possibilities of low cost funding and thus the ability to compete for public sector loans.

Fair value of investments listed in an active market is based on the current sales price. A financial instrument is considered to be listed in an active market if the listed price is simply and regularly available from a stock market, dealer, broker, industry grouping, price setting service or regulatory authority, and these prices represent actual and regularly occurring transactions at arm's length. If the market for the security is not active, or the security is not listed on a stock market or similar, valuation techniques are used to set fair value. These are based for example on information on recently completed transactions carried out on business terms and conditions, reference to trading in similar instruments and pricing using externally collected yield curves and yield spread curves. As far as possible the estimates are based on externally observable market data and rarely on company-specific information.

The different financial instruments are thus priced in the following way:

Fixed-income securities - other than government

Norwegian fixed-income securities, except government are priced directly on prices from Nordic Bond Pricing. Those securities that are not included in Nordic Bond Pricing are priced theoretically. In theoretical pricing a zero-coupon curve is used as well as yield spread curves for the pricing. Reuters is used as a source for the zero-coupon curve from 0 to 10 years. From 12 years and over, Bloomberg is used as the source since Reuters does not provide prices over 10 years. The yield curve spreads are received from Nordic Bond Pricing. These are based on yield curve spreads collected from several different market operators and converted to an average curve.

Financial derivatives

These transactions are valued based on the applicable swap curve at the time of valuation. Derivative contracts are to be used only to hedge balance amounts and to enable payments obligations to be met. Derivative contracts may be struck only with counterparties with high credit quality.

Fair value of loans to Norwegian local administrations. Fair value of lending without fixed interest rates is considered virtually the same as book value since the

contract terms are continuously changed in step with market interest rates. Lending with fixed interest is valued using a valuation model, including relevant credit spread adjustments obtained from the market.

Fair value of loans to and receivables from credit institutions

All receivables from credit institutions (bank deposits) are at variable interest rates. Fair value of these is considered virtually the same as book value since the contract terms are continuously changed in step with market interest rates.

Fair value of liabilities to credit institutions

These transactions are valued using a valuation model, including relevant credit spread adjustments obtained from the market.

Liabilities created on issuance of securities

Fair value in this category is determined on the basis of internal valuation models based on external observable data.

Fair value shall be a representative price based on what a corresponding asset or liability would have been traded for at normal market terms and conditions. Highest quality in regard to fair value is based on listed prices in an active market. A financial instrument is considered as listed in an active market if listed prices are simply and regularly available from a stock market, dealer, broker, industry group, price-setting service or regulatory authority, and these prices represent actual and regularly occurring transactions at arm's length.

- **Level 1:** Instruments at this level obtain fair value from listed prices in an active market for identical assets or liabilities to which the entity has access at the reporting date. Examples of instruments in Level 1 are stock market listed securities.
- **Level 2:** Instruments at this level obtain fair value from observable market data. This includes prices based on identical instruments, but where the instrument does not maintain a high enough trading frequency and is therefore not considered to be traded in an active market, as well as prices based on corresponding assets and price-leading indicators that can be confirmed from market information. Example instruments at Level 2 are fixed-income securities priced on the basis of interest rate paths.
- **Level 3:** Instruments at Level 3 contain non-observable market data or are traded in markets considered to be inactive. The price is based generally on discrete calculations where the actual fair value may deviate if the instrument were to be traded.

To the Board of Directors of KLP Kommunekreditt AS

Report on Review of Interim Financial Information

Introduction

We have reviewed the accompanying balance sheet of KLP Kommunekreditt AS as of 30 June 2015 and the related statements of income, changes in equity and cash flows for the six-month period then ended. Management is responsible for the preparation and presentation of this interim financial information in accordance with International Accounting Standard 34 "Interim Financial Reporting". Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity".

A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures.

A review is substantially less in scope than an audit conducted in accordance with standards on auditing adopted by Den Norske Revisorforening, and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

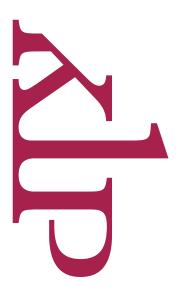

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information is not prepared, in all material respects, in accordance with International Accounting Standard 34 "Interim Financial Reporting".

Trondheim, 14 August 2015 **PricewaterhouseCoopers AS**
