Interim report second quarter 2010

Good results for KLP customers

The accounts for the first half of 2010 shows:

- Operating profit: NOK 1.5 billion
- Value-adjusted return on the common portfolio for public sector occupational pensions: 2.1 per cent
- Book return on the common portfolio for public sector occupational pensions: 2.2 per cent
- The securities adjustment fund: NOK 2.3 billion as at 30 June 2010

Good results for the first half year

The first half of 2010 produced satisfactory results for KLP despite the fact that renewed financial uncertainty during the second quarter made an impact on the quarterly figures seen in isolation.

At the end of the quarter, the Group had total assets of NOK 263.9 billion and an operating profit of NOK 1 511 million.

The Group's capital adequacy was 11.6 per cent and the core capital adequacy was 8.8 per cent as at 30 June 2010.

Kommunal Landspensjonskasse (KLP)

KLP, the life company, is the parent company in the Group. The Company's main product is public service pensions and customers with agreements for such pensions are the Company's owners.

The result after the second quarter 2010

In all, there was an inflow of NOK 4.4 billion in returns to the pension customers' assets over the first half of the year, NOK 1.4 billion of which being a surplus in excess of guaranteed interest. The aggregate profit for the customers was NOK 434 million for the quarter and NOK 1 487 million for the first half year.

Returns

Increasing uncertainty in the capital markets in the second quarter marked the returns. Value-adjusted return amounted to minus 0.1 per cent for the quarter, whereas the book return was 0.9 per cent. The corresponding percentages for the half year were 2.1 per cent and 2.2 per cent respectively. If added values in bonds held to maturity and fixed rate lendings are included, the value-adjusted return was 0.3 per cent for the quarter and 2.9 per cent for the half year.

Financial income beyond the guaranteed interest rate amounted to NOK 0.4 billion for the quarter and NOK 1.4 billion for the half year.

Risk result

There were no unexpected risk situations of significance in the Company's insurance portfolios in the second quarter. The risk result in group pensions amounted to NOK 25 million for the quarter and NOK 45 million for the half year. Up to half of the positive risk result can be allocated to the Risk Equalization Fund.

Corporate result

The Company's administration result is a surplus of NOK 24 million for the second quarter 2010 and NOK 60 million for the half year. This is somewhat lower than last year and is due to the fact that KLP reduced the cost premium for 2010. KLP has the cost level well under control.

KLP has dynamic risk control, which means that the interest guarantee premium can be kept at a low lever. Book income from the interest guarantee premium amounted to NOK 44 million for the quarter and NOK 90 million for the half year.

The total profit for the Company was NOK 124 million for the quarter and NOK 258 million for the half year.

Profits NOK million	Customers	The Company	Total

Financial strength and capital

The parent company's total assets amounted to NOK 234.8 (205.3) billion as at 30 June 2010. The Group's total assets amounted to NOK 263.9 billion.

As at 30 June 2010 the capital adequacy ratio for KLP (mother company) was 12.2 per cent and the core capital adequacy was 9.2 per cent. The equity capital contribution for the year, NOK 545 million, was called but not paid-in by 30 June and consequently not included in the capital adequacy. Were the called contribution to be included the capital adequacy would have been at the same level as it was at the end of the first quarter, 12.7 per cent.

The solvency margin ratio remains at a very sound level, 219 per cent, as against 188 per cent the year before.

At the end of the quarter, KLP's total solvency capital was NOK 28.9 billion, which is the equivalent of 14.7 per cent of insurance funds with a interest rate guarantee. The solvency capital was reduced by NOK 0.6 billion in the quarter, which is due first of all to the downturn in the equity market, whereas other factors pulled in the opposite direction.

The Company's solvency is considered strong in relation to risk profile and authority requirements.

Premium income

Premium income amounted to NOK 3 025 million for the quarter and NOK 5 964 million for the first half year, an increase of NOK 78 million on the same period in 2009.

Compensations

Pensions paid and other compensation made up NOK 4 202 (3826) million for the second half, a 10 per cent growth. Compensations for the quarter amounted to NOK 2 115 (1 909) million.

Management of the Group portfolio

The Common portfolio assets amounted to NOK 208.6 (189.6) billion and as per 30 June they were invested as follows:

Assets Per cent	Portion 30.06.10	Return 30.06. 2010	Return 30.06. 2009	Portion 31.12. 2009
Shares ¹⁾	12,6	-5,4	4,3	12,3
Short-term bonds	23,6	5,0	5,4	21,7
Long-term/HTM bonds	34,0	2,6	2,7	34,6
Lending	15,8	1,8	2,3	13,8
Property	11,4	5,7	0,6	10,9
Other financial assets	2,5	1,2	2,1	6,7

¹⁾ Exposure including derivatives.

Government financial problems in Europe are expected to impact on future financial growth. The anticipated global contagious effect has impacted on financial returns over the second quarter.

Equities

The total exposure in shares including share derivatives was 12.6 per cent.

Following the positive first quarter, where global shares, measured through KLP's global index hedged to NOK, rose by about 5 per cent and Norwegian shares were up about 1.4 per cent, the equity markets fell sharply in the second quarter 2010. To date, there has been a negative return on Norwegian and global shares, the exception being the Nordic index which had a positive return in excess of 5 per cent as at 30 June. The global index was down 11.2 per cent in the second quarter 2010, whereas the return on the OSEBX index was down 12.9 per cent over the same period. The combined return for the global index for the first half year 2010 was minus 6.8 per cent and for the Oslo Stock Exchange it was minus 11.7 per cent. KLP's share portfolios produced a return of minus 5.4 per cent as at 30 June 2010.

Short-term bonds

Short term bonds and money market instruments made up 26.1 per cent of the assets in the common portfolio as at 30 June 2010.

The return on Norwegian and global government bonds was high in the first quarter 2010, 5.7 per cent and 5.2 per cent respectively, measured through relevant indexes. The Norwegian government bond index had a high return both in the first and the second quarter: 2.5 per cent and 3.1 per cent respectively, whereas the equivalent figures for the global government bond index was 1.6 per cent in the first quarter and 3.6 per cent in the second. High returns on government bonds are due to falling interest rates as a result of government financial problems in Europe coupled with uncertainty with regard to the growth estimate in the US.

The international credit bonds index that KLP follows and which consists of bonds with a BBB rating or higher, had a 5.5 per cent return in the first quarter 2010. Both the first and the second quarters were positive with 2.8 per cent and 2.6 per cent respectively. This is due to falling global interest rates. On the other hand, credit premiums have had an upswing. Norwegian credit bonds had lower returns and drew the overall result down, so that KLP's portfolios of short-term bonds produced a 5.0 per cent return for the half year.

Hold-to-maturity bonds

Investments in hold-to-maturity bonds accounted for 34.0 per cent of the common portfolio as at 30 June 2010. Added values not brought to book amounted to NOK 3.3 billion as at 30 June 2010. The portfolio is well diversified and consists of securities issued by institutions with strong creditworthiness.

1) Figures in brackets indicate corresponding values for Q2 2009

Properties

Properties accounted for 11.4 per cent of the common portfolio as at 30 June 2010. KLP carries out a thorough valuation of its property stock every quarter. Up until now in 2010, the reviews carried out show that the markets to a certain extent regained the decline in value during 2008 and 2009. This means that the property values in the common portfolio were appreciated by NOK 201 million in the second quarter 2010 and altogether by NOK 615 million in the half year. Value-adjusted returns in the second quarter made up 2.3 per cent in the common portfolio and 5.7 per cent in the first half year (including property funds).

In the second quarter, KLP entered into an agreement to buy the premises occupied by Skatt Øst in Bjørvika, to be closed in August. This implies an investment in the order of NOK 725 million and will further strengthen KLP's position in and around Bjørvika.

Lending

KLP's lending portfolio amounted to NOK 33.0 billion, which is a NOK 4.7 billion increase since the beginning of the year. The portfolio was split between NOK 24.6 billion in loans to municipalities and other employers, and NOK 8.4 billion in mortgaged home loans. What characterizes the lending portfolio is high quality, no losses on municipal loans, and very modest provision for loss on home loans.

Return on the corporate portfolio

The corporate portfolio represents the investment of the equity capital and borrowed Tier 1 and Tier 2 capital.

The corporate portfolio is managed according to a long-term investment horizon, the aim being to obtain stable returns and equity capital growth. The investments in the corporate portfolio obtained a 1.3 per cent return in the second quarter and a 2.4 per cent return for the half year.

The product and market situation

Operating environment

Reduction of the base rate

The Financial Supervisory Authority of Norway has sent out a proposal for consultation to reduce the base rate for all new earnings (even in existing contracts) with effect from 2011, alternatively from 2012.

KLP has nothing against reducing the base rate for new contracts and believes that the Norwegian practice should be adapted to international interpretation of the underlying directive, which implies that the rules should apply to new contracts only. However, KLP is skeptical about reducing the base rate

for future earnings on existing contracts now. Having multiple base rates relating to the individual insured are technically complicated. Moreover, they are not very transparent and are difficult to communicate to the customers. A working party among the Financial Supervisory Authority of Norway and the life companies is still very much required. Such a group should also explore solvency measures that are more expedient with regard to the technical and system aspects.

Reducing the base rate for new premium income is primarily effective in a long-term perspective as a solvency-promoting measure. Reducing it by half a percentage unit will mean an annual reduction of the average base rate of less than 0.05 percentage units. From the point of view of solvency, this is of very little help in a low interest rate scenario which will normally continue for a relatively short number of years. The Norwegian system with pricing of the interest rate guarantee is far more effective for ensuring solidity for the life companies through varying interest rate levels in a shorter time perspective. In the present low interest rate situation, considerable importance should be given to this.

Changing the occupational pension schemes as a result of the pension reform means that both life companies and customers must relate to many things being changed. It is desirable that this is focused on, not only because the life companies' resources should be concentrated on the pension reform but also so that customers do not have to relate to even more financial changes than those relating to the pension reform.

When it comes to private schemes, it seems to be particularly unfortunate to introduce a change to the base rate before the Banking Rate Commission has completed its ongoing work on the framework for changes to defined benefit schemes in the private sector. KLP also places emphasis on the fact that after the implementation of Solvens II from 2013 onwards, the base rate will be of less importance to technical provisions in the life companies. Against this background, it seems quite pointless to introduce technically complicated and cost-driven changes in the handling of the base rate now. A reduction of the base rate from 2011/2012 will hardly have any effect until the Solvens II regime takes over from 2013 onwards.

Longevity

There is a certain focus on strengthening reserves for long life in individual insurance. KLP does not have individual insurance. The strengthening in individual insurance is comparable to the process that was carried out on the transition to K2005 for group pension some years ago. KLP is only active in group pensions and therefore does not need further strengthening.

The competitive situation

So far in 2010 it seems that very few of KLP's municipal customers will be out for tender. Several of the competition's customers have warned that they will put their pension schemes out to tender and so far five tenders have been publicized. However, it is too soon to say anything for certain as to how this will develop in the course of the autumn.

The subsidiaries' areas of business

Private occupational pensions

Through KLP Bedriftspensjon AS KLP offers defined benefit and defined contribution pensions to companies that do not come under any collective agreement for public sector occupational pensions.

KLP Bedriftspensjon has been operating for three years and now sees strong growth in the number of new customers, most of them being in the market for defined contribution pensions.

KLP Bedriftspensjon obtained a value-adjusted return in the common portfolio of 2.4 per cent in the first half of 2010.

Customers with defined contribution pensions can choose between several standard saving profiles with varying risk, defined by a varying part of the funds being invested in shares. No customers have so far chosen pure money market funds. The relevant defined contribution pension profiles obtained the following returns in the first half year:

Returns as a percentage	As at 30 June 2010
Equity stake 90 per cent	-7.18
Equity stake 70 per cent	-2.89
Equity stake 50 per cent	-1.39
Equity stake 30 per cent	0.92

As a result of good returns in the common portfolio in the first quarter, the Company can book a profit for the customers of NOK 3.3 million in the first half year. This reflects a drop of NOK 1.4 million over the second quarter. The Company's administration result is still marked by a low volume in relation to the investment level in systems and other costs. Including the negative administration result of NOK 11.1 million, the total result for the second quarter was negative: minus NOK 4 million and minus 7.1 million for the first half year.

Non-life insurance

KLP Skadeforsikring AS retains a significant position as provider of non-life insurance to municipalities and county administrations. The Company also has a growing number in municipi-

pal enterprises and companies in associated sectors.

Despite strong competition net new sales show a positive trend both in the personal market and employer segments.

In the first half of 2010, KLP Skadeforsikring AS had a profit of NOK 12 million, whereas the second quarter produced a deficit of NOK 24 million. The result for the first half year is characterized by five major property claims which after reinsurance cost NOK 80 million, of which as much as NOK 50 million was in the second quarter.

Financial returns for the period were satisfactory with a total return of 2.7 per cent. The turbulence in the financial services markets and particularly in the equity market marked the returns in the second quarter, which ended at 0.2 per cent.

The Company has maintained a healthy capital base with sufficient buffers against further negative claim trends and its capital adequacy was 29.8 per cent as at 30 June 2010, against the authorities' minimum limit of 8 per cent.

KLP Kapitalforvaltning and KLP Fondsforsvaltning

The KLP Group's securities management is covered by KLP Kapitalforvaltning AS and KLP Fondsforsvaltning AS. In all, NOK 176.4 billion was being managed in securities funds and discretionary portfolios by the end of the first quarter 2010. The bulk of the assets is being managed on behalf of Kommunal Landspensjonskasse and the KLP Group's subsidiaries.

Assets managed on behalf of external investors and private individuals grew by 22 per cent last year, amounting to NOK 12 billion by the end of the first half year. Net new subscriptions by Group-external customers to KLP's securities funds amounted to NOK 715 million for the first half year 2010.

KLP Kapitalforvaltning AS obtained a profit of NOK 13 million for the half year. KLP Fondsforsvaltning AS had a negative result of NOK 0.6 million.

KLP Banken

The Group's lending activity towards the municipal loans market comes under the common denomination of KLP Kommunekreditt. The loans are booked either in KLP's common portfolio, with KLP Kreditt AS or with KLP Kommunekreditt AS, and are managed by KLP Banken.

KLP Kommunekreditt AS is established as a credit institution issuing pre-emptive bonds with security in municipal loans. During the second quarter, a major undertaking was made to

complete KLP Kommunekreditt's international covered bond programme. The programme was signed on 5 August, and will with the best rating provide good market terms for financing our customers.

The Bank's results show that it is still in a start-up phase with costs accruing in relation to the starting up of the business. The KLP Banken Group returned a deficit, minus NOK 4.9 billion, for the first half year, but the second quarter returned a profit of NOK 15.0 million. The Bank Group's solvency is good, capital adequacy being 17.9 per cent against the authorities' requirement of 8.0 per cent.

Group activities

KLP's new head office

On 25 May, KLP concentrated all its activities in the Oslo area in a new, suitable 25,000-square metre head office in Bjørvika, a newly-developed area in central Oslo. The building has a high standard, with flexible and good workplaces. Good environmental solutions have formed the basis for the layout of the building, in line with KLP's fundamental policy. The property was taken over at the beginning of April and has been included in the corporate portfolio.

A responsible investor and owner

KLP and the KLP funds are active owners and increasingly use their voting rights at general meetings in accordance with the principles on which their corporate governance is based.

KLP wishes not to be an owner in companies connected with breaches of basic rights or companies that do not take on the necessary responsibility for the environment – or for society. Against that background, a list is published every six months of those companies that do not satisfy KLP's ethical requirements. In June, another four companies were excluded at the half year review, whilst two companies were reinstated.

Future prospects

KLP has considerable financial strength, good risk management, and well adapted asset management. Consequently the Company can account for a satisfactory result in a quarter marked by financial turbulence.

Accounts reflect the Company's financial situation on a given date, whereas the markets in which the Company operates are under constant change. The markets have shown a more positive trend again during the summer.

KLP's new head office in Bjørvika has state of the art technical solutions and the space has been effectively exploited using the open office system. This, plus the fact that several divisions have been located together, is expected to provide the Group with positive synergies in future.

Note 1 Accounting principles

The accounts in this interim report show the accounts for Kommunal Landspensjonskasse (KLP) and the Group for the period 01.01.2010 - 30.06.2010. The accounts have not been audited.

The Group interim accounts are presented in accordance with internationally EU-approved accounting standards (IAS/IFRS). This interim report has been prepared in accordance with IAS 34 "Interim Financial Reporting" and follows the same accounting principles as used in the annual accounts.

The following norms were amended with effect from 1 January 2010:

- IFRS 3 Business mergers
- IAS 27 Group accounts and fiscal accounts

The changes to these accounting norms have not been relative to the Group's business, nor have they impacted on the financial reporting in 2010.

It is recommended that this interim report be read in conjunction with the annual report for 2009 and the interim report Q1 2010. This may be obtained on application to the Company's registered office, Dronning Eufemias gate 10, Oslo, or at www.klp.no.

Note 8 Events after the balance sheet date

In the second quarter a call were made out for owners' equity contribution of NOK 545 million, to be paid-up in the third quarter. The owners' equity contribution is only brought to book when it is paid in, which means that the invoiced owners' equity contribution had no effect on the second quarter accounts. As at the end of July, NOK 518.5 million of the invoiced owners' equity supplement had been paid.

Note 1 Accounting principles

The accounts in this interim report show the accounts for Kommunal Landspensjonskasse (KLP) and the Group for the period 01.01.2010 - 30.06.2010. The accounts have not been audited. The interim accounts do not contain all the information required of full annual accounts.

It is recommended that this interim report be read in conjunction with the annual report for 2009 and the interim report for Q1 2010. This may be obtained on application to the Company's registered office, Dronning Eufemias gate 10, Oslo, or at www.klp.no.

Similarly to the annual accounts 2009, the interim accounts have been submitted in accordance with Regulation 1241 of 16 December 1998: Regulations on annual accounts etc. for insurance companies (the Annual Accounts Regulations).

Note 2 Value-adjustment investment property

The portfolio of investment properties including investment properties owned via subsidiaries has been valued as at 30 June 2010.

NOK million	Q2 2010	01.01.10 -30.06.10	Q1 2010	01.01.09 -30.06.09	01.01.09 -31.12.09

Insurance-related provisions - obligations under contract	208 487	189 175	204 246

Note 5 Transactions with related parties

On 15 June 2010 KLP took over loans/receivables of NOK 4,032 million from KLP Kreditt AS on 15 June 2010. The amount included the principal, interest accrued, and premium.

KLP granted KLP Banken AS two short-term loans at the end of the first quarter. The loans amounted to NOK 1.3 billion and NOK 2.0 billion respectively. As agreed, these loans were repaid during the second quarter. The loans were granted at market rate (NIBOR + margin).

During the second quarter, KLP Banken AS was granted two further loans by KLP. One of the loans (of NOK 0.5 billion) was repaid during the quarter as agreed, whereas the other loan (of NOK 2.5 billion) falls due on 15 September. Market conditions (NIBOR + margin) applied to both loans.

Note 6 Events after the balance sheet date

In the second quarter invoices were made out for owners' equity contribution of NOK 545 million, to be paid-up in the third quarter. The owners' equity contribution is only brought to book when it is paid in, which means that the invoiced owners' equity contribution had no effect on the second quarter accounts. As at the end of July, NOK 518.5 million of the invoiced owners' equity supplement had been paid.
